

Geography Knowledge Organiser Term 1

Changes in our local environment - How is the UK Changing?

Key Objectives

- To name and locate some areas of the UK, including places specific to where we live.
- To understand that local people will have differing opinions about change in their region.
- To understand that regions change overtime for different reasons - some of which are uncontrolled.
- To understand that change is constantly happening in the local area.
- To consider the proposed plans for Cirencester and their impacts.

Key Words

Word	Definition
Continent	A very large area of land on Earth. There are 7 in total. Each one is made up of many different countries.
Ocean	A huge body of salty water that covers much of the Earth's surface. Oceans are even bigger than seas and they separate continents for each other.
Country	A piece of land with its own borders, people and government. They form parts of continents.
Region	An area of the UK that is often grouped by its features. E.g. The South West is known for it's coastline and countrysides.
County	A part of a country and region. It's a smaller area that helps organise places and people. Counties often have their own towns and cities.

Sticky Knowledge

- Name and locate 3 cities of the United Kingdom.
- Name and locate some of the main regions of the UK.
- Describe and understand key aspects of how and why settlements develop, how they change and why they differ.
- Name and locate counties and cities of the UK.
- Name some advantages and disadvantages of change in different areas of the UK.
